This document is jointly developed by GOTS and Textile Exchange for the harmonized application of their policies for scope and transaction certificates.

This classification is a dynamic document that will be continually edited and updated. New versions will be published as required.

This is a voluntary procedures document and is not intended to replace the legal or regulatory requirements of any country.

1 PURPOSE

1.1 TARGET AUDIENCE

This document is primarily developed for certification bodies for use in its certification process. Secondary users include suppliers, manufacturers, brands/retailers, and other stakeholders that have an interest in GOTS and Textile Exchange standards.

1.2 OBJECTIVES

Standardize the classification of raw materials, process categories, product categories, and product details for GOTS and Textile Exchange’s standards.

Standardize the classification of organic standards accepted as organically grown material inputs by GOTS and Textile Exchange standards.

Ensure raw materials, process categories, product categories, and product details that are always, usually, or occasionally used on scope and transaction certificates are covered.

Provide a systematic reporting framework for raw materials, process categories, product categories, and product details.

Provide guidance on the selection and pairing of raw materials, process categories, product categories, and product details.

2 METHODOLOGY

2.1 GUIDING PRINCIPLES

The classification of raw materials, process categories, product categories, and product details is:

- Intended for the specification of scope and transaction certificates only and not for labelling. (Sellers are responsible for the accuracy of product label claims and its compliance with all regulations in the country of sale.)

- Intended to report on a class or group, rather than a specific unit, because “User Specific Terms” can be used on scope and transaction certificates for the latter purpose.

- Mapped to provide systematic reporting at five levels: fibre/material, yarn, fabric, product, and reclaimed materials (see: Appendix C - Reporting Framework).

- Assessed on its frequency of use (“always”, “usually”, “occasionally”, “rarely”, or “possibly”). For practical reasons, only raw materials, process categories, product categories, and product details that are “always”, “usually”, and “occasionally” used are included in the final lists. Raw materials, process categories, product categories, and product details that are not included in the classification should be covered by the generic class “Other”.

- Complementary to one another and are considered together. Redundant terms are omitted wherever possible.

2.2 APPROACH

The following steps were taken in the development of the raw materials, process categories, product categories, and product details classification. Group and bilateral consultations with certification bodies were held for feedback during this process.
Raw Materials

- The raw materials listed in the European Regulation on Fiber Labelling and European Regulation on Organic Labelling were used as a baseline to evaluate completeness (see: Appendix A - Raw Materials Mapping).

- The baseline list was then mapped against the lists of raw materials from preceding classifications from the Scope Certificate Policy and those provided by certification bodies and brands.

- The attributes in-conversion, organic, recycled pre/post-consumer, recycled pre-consumer, and recycled post-consumer were applied to all animal and plant-based raw materials. The attribute responsible was applied to selected animal-based raw materials. The attributes recycled pre/post-consumer, recycled pre-consumer, and recycled post-consumer were applied to all synthetic, cellulosic, inorganic, and miscellaneous raw materials. The attributes sustainably sourced and content claimed were applied to specific raw materials assigned by either GOTS or Textile Exchange.

Process Categories

- Although there are numerous textile process classifications, none of these classifications is accepted as the industry standard. Assessment is therefore carried out on process categories from preceding classifications from the Scope Certificate Policy and cross-checked against processes required to produce the product categories and product details.

- A completeness check was then carried out to ensure that there is a process in place for each of the input and output products of different raw materials.

Product Categories and Product Details

- Product categories were determined with GOTS and Textile Exchange's reporting requirements as a starting point.

- Completeness was then checked against the latest iteration (H3) of The Harmonized Commodity Description and Coding System. Where possible, mapping was carried out at level 4 of H3. In selected cases, level 6 was mapped. Whilst level 1 of H3 was reviewed completely, maximum coverage was specifically targeted at H3 50-63 as those are specific to textiles.

- Further completeness was then checked against the input and output products needed for each raw material and process category.

- To reduce duplicative iterations, the principle of many-to-many was applied to product categories and product details—where many different combinations of classifications are possible and therefore allowed. Guidance is provided on the pairing of product categories and product details, but users may select any product details together with any product categories.

Organic Standards

- Organic standards for farm level inputs accepted by GOTS and Textile Exchange are based on the IFOAM Family of Standards.
2.3 USER SPECIFIC TERMS

2.3.1 Despite all considerations taken in the classification of terms, there will be cases where the class itself would fit but not its name. The terms provided in this classification may be too general, overlook the specificity of an individual product, or not reflect common terms used in a certain region or industry. We address this by allowing users to apply their own terms in place of terms provided in this classification. Such individual terms are referred to in this document as “User Specific Terms”.

2.3.2 For legal reasons, all use of User Specific Terms must remain generic and shall not, under any circumstances, contain tradenames, names of standards, programs, and initiatives, or names of breeds, varieties, and species.

2.3.3 While GOTS and Textile Exchange do not recommend the general use of User Specific Terms, we recognize that in certain cases, it may be necessary. We do, however, mandate the use of the classification codes in all cases, so that we can always reference a term back to its designated class.

3 CLASSIFICATION

3.1 RAW MATERIALS

3.1.1 Each raw material is listed on its own (e.g. cotton) and may have one or more attributes (e.g. in-conversion cotton, organic cotton, recycled pre/post-consumer cotton, recycled pre-consumer cotton, recycled post-consumer cotton, sustainably sourced, and content claimed).

3.1.2 For all GOTS and Textile Exchange standards, unless the raw materials are certified for the specified attribute, users shall only specify the raw materials under “no attribute”.

3.1.3 Raw material attributes\(^1\) such as “no attribute, recycled pre/post-consumer, sustainably sourced” are not certified to GOTS and any of Textile Exchange standards and shall be considered as non-certified material.

3.1.4 For RCS and GRS standards, users shall either apply recycled pre-consumer or recycled post-consumer as an attribute to raw material.

3.1.5 Raw materials which have been processed within an approved mass balance system at any stage within the supply chain shall be classed using a “VR2” raw material code through the remainder of their supply chains. (See: CCS-101 Content Claim Standard for eligibility requirements for mass balance systems.)

3.1.6 Recycled pre/post-consumer attributes shall only be applied for recycled raw materials for GOTS.

3.1.7 Sustainably sourced attributes shall be limited to the use of raw materials covered by the GOTS standard.

3.1.8 In contrast to process categories, product categories, and product details, User Specific Terms shall not be used to replace the names of any raw materials listed in this classification, except for those classed as “other” (RM0262 to RM0267). In such exceptions, the use of User Specific Terms must be generic and shall not, under any circumstances, contain tradenames, names of standards, programs, and initiatives, or names of breeds, varieties, and species.

\(^1\) For Scope Certificates and Transaction Certificates issued as per GOTS, the recycled component does not carry GRS or RCS claims, therefore, use of the attribute Recycled pre/post-consumer should be applied.
3.1.9 “Other” (RM0262 to RM0267) shall only be applied to raw materials not listed in this classification. In such case, the application of raw material codes in “other” shall correspond to its associated attributes (e.g. “no attribute” for non-certified, and “in-conversion”, “organic”, “recycled pre/post-consumer”, “recycled pre-consumer”, “recycled post-consumer”, “sustainably sourced”, and “content claimed” for certified or accepted materials). Additionally, the use of User Specific Terms for the specification of the raw material is mandatory in place of the word “other”.

</table>
3.2 PROCESS CATEGORIES

3.2.1 Table 3.2 provides a list of process categories and samples of the specific processes that it covers. If only a specific process is applicable, users are advised to use a User Specific Term.

3.2.2 For Textile Exchange standards, if the listed processes are carried out by homeworkers, User Specific Terms should be applied, specifying the process followed by “homeworkers” (e.g. Weaving – homeworkers).

3.2.3 The category “No processing” (PR0000) shall be the default category where no processing of goods is performed. The only use for this is in the Facilities Appendix of a scope certificate, namely for cases where the scope certificate holder is neither directly involved in the actual processing of goods nor has a specific code listed in the table below (e.g. headquarters, marketing, administration, finance office of a scope certificate holder). It shall not be listed on the first page of the scope certificate.

3.3 PRODUCT CATEGORIES

3.3.1 Appendix B - Mapping of Product Categories and Product Details and Appendix D - Illustrative Examples provides guidance on how to use the product categories and product details.

3.3.2 If a product is made of more than one certified component, certification bodies shall issue transaction certificates based on the component instead of the product (see Example 7: Components).

### 3.5 ORGANIC STANDARDS

3.5.1 GOTS and Textile Exchange recognizes all organically grown material inputs from a farm certified by an accredited certification body that is part of the [IFOAM Family of Standards](https://www.ifoam.org). Listing given here is for guidance alone. IFOAM website should be checked for currency of this list.

APPENDIX B - MAPPING OF PRODUCT CATEGORIES AND PRODUCT DETAILS

The following table outlines the recommended mapping of product details to product categories.

The mapping of product categories and product details to HS Code H3 is carried out for the sole purpose of facilitating a check for completeness. It is not intended as a specification on which customs code to apply.

Where a component of product detail is in question (e.g. shoe sole, jacket shell), users are recommended to select the whole product (i.e., shoe, jacket) and specify the component in User Specific Terms.

Note: Certain terms within this Section are not applicable for GOTS.

<td>“Greige yarns” refer to yarn output of spinning processes. “Undyed yarns” refer to yarn output from pre-treatment, ready for dyeing (RFD). “Dyed yarns” refer to yarn output of dyeing processes. For input of recycled cotton and output of viscose or cupro covered by GRS and RCS, users are required to specify either “Viscose filament” or “Cupro filament” as a User Specific Term for product detail. Where mélange or embroidered yarn is a certified product, users are required to specify “Mélange yarns” or “Embroidery yarns” as a User Specific Term for product detail. Combing applied to different spinning processes produces combed yarns of varying quality that must be differentiated: • Semi-combed (upgrading) with a noil percentage below 12%, • Normally combed, with a noil percentage between 12 to 18%,</td>

APPENDIX D - ILLUSTRATIVE EXAMPLES

This section provides some illustrative examples of how raw materials, process categories, product categories, and product details should be applied. These are illustrative examples for guidance purposes only. Users are expected to carry out their own assessment of the certified product and exercise their best judgment on how to use the product categories and product details in accordance with the objectives of this classification.

In contrast to process categories, product categories, and product details, *User Specific Terms* must not be used to replace the names of any raw materials listed in this classification, except for those classed as “Other” (RM0262 to RM0267). In such exceptions, the use of *User Specific Terms* must be generic and shall not, under any circumstances, contain tradenames, names of standards, programs, and initiatives, or names of breeds, varieties, and species. The use of *User Specific Terms* is illustrated below in [blue] together with the respective official classification terms. On the printed certificate, either the *User Specific Term* or the official term should be displayed.

Examples of acceptable and not acceptable application of *User Specific Terms* on the printed certificates:

<table>
<thead>
<tr>
<th>Official processing category:</th>
<th>User Specific Term applied:</th>

<tbody>
<tr>
<td>Cotton (RM0102)</td>
<td>Egyptian cotton (RM0102)</td>
</tr>
</tbody>
</table>

EXAMPLE 1: COTTON LINTER

As a by-product of the Ginning (PR0013) process, Cotton linter (PD0083) product detail should be applied to Undyed fibres (PC0034) product category. Users should specify Delinting as a *User Specific Terms* of the Ginning process for specificity.

Scope Certificate – Cover Page

EXAMPLE 2: YARNS, COMBER NOIL, AND TOPS

Open-end yarns (PD0066), Carded yarns (PD0067), Semi-combed yarns (PD00101), Normally combed yarns (PD0102), Highly combed yarns (PD0103), and Super combed yarns (PD0068), Filament (PD0069), Yarns of hand knitting (PD0070), Core-spun yarns (PD0071), Fancy yarns (PD0072), and Sewing threads (PD0041) are possible product details for Dyed yarns (PC0029), Greige yarns (PC0030), and Undyed yarns (PC0031) product categories.

As a by-product of the Spinning (PR0026) process, Comber noil (PD0082) product detail should be applied to either Dyed fibres (PC0033) or Undyed fibres (PC0034) product categories.

Scope Certificate – Cover Page

<td>Combed yarns (PD0068)</td>
<td>70% Organic cotton (RM0104) + 30% Organic Kapok (RM0128)</td>
<td>Organic</td>
</tr>
</tbody>
</table>

EXAMPLE 3: KNITTED FABRICS, WOVEN FABRICS, TERRY FABRICS, AND DENIM FABRICS
Knitted fabrics (PD0058), Woven fabrics (PD0059), Terry fabrics (PD0060), Denim fabrics (PD0061), and other similar product details should be applied to Dyed fabrics (PC0025), Greige fabrics (PC0026), and Undyed fabrics (PC0027) product categories. Since Terry fabrics and Denim fabrics are more specific, the application of Terry fabrics and Denim fabrics takes precedence over Woven fabrics in product details.

Scope Certificate – Cover Page

| Product category | Dyed fabrics (PC0025); Greige fabrics (PC0026); Undyed fabrics (PC0027) |

| Processing step/activity | Preparatory (PR0022); Weaving (PR0033); Knitting (PR0015); Dyeing (PR0008); Finishing (PR0012); Printing (PR0023) |

Scope Certificate – Product Appendix

<table>
<thead>
<tr>
<th>Product category</th>
<th>Product detail</th>
<th>Material composition</th>
<th>Label Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dyed fabrics (PC0025)</td>
<td>Terry fabrics (PD0060)</td>
<td>95% Organic cotton (RM0104) + 5% Recycled pre/post-consumer polyester (RM0187)</td>
<td>Organic</td>
</tr>
<tr>
<td>Dyed fabrics (PC0025)</td>
<td>Denim fabrics (PD0061)</td>
<td>70% Organic cotton (RM0104) + 25% Recycled pre/post-consumer polyester (RM0187) + 5% Elastane (spandex) (RM0160)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Printed fabrics (PC0039)</td>
<td>Woven fabrics (PD0059)</td>
<td>90% Organic cotton (RM0104) + 10% Modal (RM0230)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Greige fabrics (PC0026)</td>
<td>Knitted fabrics (PD0058)</td>
<td>75% Organic cotton (RM0104) + 15% Recycled pre/post-consumer polyester (RM0187) + 10% Polyamide (nylon) (RM0182)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Greige fabrics (PC0026)</td>
<td>Woven fabrics (PD0059)</td>
<td>90% Organic cotton (RM0104) + 10% Modal (RM0230)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Undyed fabrics (PC0027)</td>
<td>Knitted fabrics (PD0058)</td>
<td>90% Organic wool (RM0079) + 10% silk (RM0065)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Undyed fabrics (PC0027)</td>
<td>Woven fabrics (PD0059)</td>
<td>95% Organic silk (RM0067) + 5% vicuna (RM0071)</td>
<td>Organic</td>
</tr>
</tbody>
</table>

EXAMPLE 4: NON-WOVEN FABRICS, SPECIAL FABRICS, LEATHER, AND BONDED LEATHER

Product category Fabrics (PC0028) should only be used for product details such as Non-woven fabrics (PD0062), Special fabrics (PD0063), Leather (PD0064), Bonded leather (PD0065), and other fabric types that cannot be covered by Dyed fabrics (PC0025), Greige fabrics (PC0026), and Undyed fabrics (PC0027) product categories. The following example shows how Non-woven fabric should be specified, Special fabrics, Leather, and Bonded leather can be applied the same way with respect to their own processing step/activity.

Scope Certificate – Cover Page

<table>
<thead>
<tr>
<th>Product category</th>
<th>Fabrics (PC0028)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing step/activity</td>
<td>Non-woven manufacturing (PR0019)</td>
</tr>
</tbody>
</table>
EXAMPLE 5: TRIMS AND ACCESSORIES

Only trims and accessories that are independently certified can be specified as products. In such cases, they fall within the Functional accessories (PC0017) product category. Available product details within this category include Buttons (PD0036), Zippers (PD0037), Labels, Tags (PD0038), Trimmings (PD0039), Interlining (PD0040), and Sewing threads (PD0041).

Scope Certificate – Product Appendix

<table>
<thead>
<tr>
<th>Product category</th>
<th>Product detail</th>
<th>Material composition</th>
<th>Label Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fabrics (PC0028)</td>
<td>Non-woven fabrics (PD0062)</td>
<td>100% In-conversion wool (RM0078)</td>
<td>Organic-in conversion</td>
</tr>
<tr>
<td>Fabrics (PC0028)</td>
<td>Non-woven fabrics (PD0062)</td>
<td>70% Organic cotton (RM0104) + 30% Nettle (RM0138)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Fabrics (PC0028)</td>
<td>Special fabrics [laces] (PD0068)</td>
<td>100% In-conversion cotton (RM0103)</td>
<td>Organic-in conversion</td>
</tr>
</tbody>
</table>

EXAMPLE 6: SUPPLIER TRADENAME

A seller’s product tradename may be specified as part of a User Specific Term for product details of the seller’s scope and transaction certificates for a given product. Tradenames cannot be specified on either a buyer’s scope or transaction certificates, even if the buyer is buying that product with a transaction certificate bearing a seller’s tradename.

When a seller’s tradename is used, it must appear as part of a User Specific Term for product detail.

Scope Certificate – Product Appendix

<table>
<thead>
<tr>
<th>Product category</th>
<th>Product detail</th>
<th>Material composition</th>
<th>Label Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Functional accessories (PC0017)</td>
<td>Labels, tags (PD0038)</td>
<td>100% Organic cotton (RM0104)</td>
<td>Organic</td>
</tr>
<tr>
<td>Functional accessories (PC0017)</td>
<td>Interlining (PD0040)</td>
<td>70% Organic cotton (RM0104) + 30% Recycled pre/post-consumer polyester (RM0187)</td>
<td>Made with organic materials</td>
</tr>
<tr>
<td>Bedding (PC0015)</td>
<td>Mattresses [RestFree™ Mattresses] (PD0034)</td>
<td>100% Organic cotton (RM0104)</td>
<td>Organic</td>
</tr>
</tbody>
</table>
EXAMPLE 7: MÉLANGE YARNS AND FABRICS

For mélange yarns and fabrics, users should select either the Dyed yarns (PC0029) and Dyed fabrics (PC0025) as the product category, select respective yarn types as the product detail and specify mélange followed by the yarn type as the User Specific Term.

Scope Certificate – Cover Page

<table>
<thead>
<tr>
<th>Product category</th>
<th>Dyed fibres (PC0033); Dyed yarns (PC0029); Dyed fabrics (PC0025)</th>
</tr>
</thead>
</table>

<td>Staple fibres (PD0079)</td>
<td>100% Organic cotton (RM0104)</td>
<td>Organic</td>
</tr>
<tr>
<td>Dyed yarns (PC0029)</td>
<td>Open-end yarns [Mélange open-end yarns] (PD0066)</td>
<td>96% Organic cotton (RM0104) + 4% Recycled pre/post-consumer polyester (RM0187)</td>
<td>Organic</td>
</tr>
<tr>
<td>Dyed fabrics (PC0025)</td>
<td>Knitted fabrics [Mélange knitted fabrics] (PD0058)</td>
<td>100% Organic cotton (RM0104)</td>
<td>Organic</td>
</tr>
</tbody>
</table>

EXAMPLE 8: FILLING, STUFFING

The Filling, stuffing (PC0020) product category should only be applied to an output of a processor (see: Example 13: Down Farm Production → Trading). When specifying the filling/stuffing of a product, users should specify the product category of the finished product (i.e., Men’s apparel), in the product detail select the appropriate classification (i.e., Overcoats, jacket, vests), then specify “filling, stuffing” as a User Specific Term for product details (e.g. Vests – filling, stuffing).

Scope Certificate – Cover Page

<table>
<thead>
<tr>
<th>Product category</th>
<th>Men’s apparel (PC0001)</th>
</tr>
</thead>
</table>

<td>80% Organic cotton (RM0104) + 20% Recycled pre/post-consumer polyester (RM0187)</td>
<td>Made with organic materials</td>
</tr>
</tbody>
</table>

EXAMPLE 9: PERSONAL CARE, HYGIENE PRODUCTS
The Personal care, hygiene (PC0013) product category should be applied to the products that are covered under Section 6.1.1 of GOTS Version 6.0. Examples of Topical products (PD0032) are given in Group I and those for Invasive products (PD0033) are given in Group II in that Section. In Scope Certificates, the name of the product shall be given as a User Specific Term for product details (e.g., tampons, ear buds, etc.).

**Scope Certificate – Cover Page**

<table>
<thead>
<tr>
